

CRANE

PROGRESSIVE PSYTRANCE - ISRAEL

ARTIST BIOGRAPHY

CRANE is the psytrance project of Israeli producer and musician Sagi Cohen. After 13 years in music production, Sagi created CRANE to bring together the sounds he loves most: powerful grooves, tribal rhythms, live instruments and inspiration from nature. His goal is simple: to create original music that works on the dancefloor and gives every set its own character.

Emerging from Israel's vibrant psytrance scene, CRANE spent more than a decade shaping his musical identity before launching his solo project. His sound blends progressive psytrance with tribal rhythms, cinematic atmospheres and organic instrumentation, creating immersive journeys rather than conventional DJ sets.

Inspired by nature, ancient rituals and the symbolism of the crane, every production is built to tell a story. With eleven official releases and a growing presence on nature-event dancefloors, CRANE connects powerful dancefloor energy with spirit, emotion and cinematic progression.
